

Idea: Heated storage public space made available for the local companies

Number in the database: 35

Area: 15

Idea description

Title:	Heated storage public space made available for the local companies
Idea objective	<p>The aim of this activity is reduce for local companies' expenses on heating storage spaces (especially important in a situation of dramatically rising energy and heat source prices), by sharing such spaces with local public institutions . The activity is dedicated to those entities which store products or means of production during the winter period, and premises that guarantee the maintenance of temperatures above 0 degrees C. are required for this purpose. (or more - depending on the sensitivity of the products).</p> <p>The essence of the measure lies both in achieving higher efficiency (through savings), as well as allowing companies to stockpile inventory in the face of rising prices (inflation, cost of currency) or temporary shortages of various factors of production (e.g., during winter). The availability of heated spaces of a storage nature in public institutions may be limited to spaces of such nature/purpose (warehouses, basements, garages), as well as possible within unused spaces serving other purposes: educational (schools), leisure (cultural institutions, sports, tourism).</p> <p>Implementation of the activity requires taking into account existing regulations on the purpose and security of the premises, paying attention to potential collisions with the statutory activities of these institutions.</p>
Sharing process (max 1000 characters)	<p>Implementation of the measure requires the City Hall to carry out the following activities:</p> <ul style="list-style-type: none"> - diagnosis of storage spaces in public institutions and the prospects for their availability during the winter, - diagnosis of need heated storage space among for local businesses, - development of a map of space availability (size, temperature, humidity, logistical conditions, availability over time and others), - preparation of rules for the use of space by enterprises (in general for all public institutions or individually), - sharing and monitoring of availability space.
Restrictions/rules (law, skills, time, other)	<p>Action may be limited by the following factors:</p> <ul style="list-style-type: none"> - formal requirements related to the purpose of the premises of public institutions, - The availability of premises and on-site conditions, - potential problem can be of the provided space with the statutory activities of the institution.
Procedures (if applicable)	The activity will be require the preparation of regulations defining the rules for the use storage space of public institutions and relevant decision of the City or individual units.
Costs for public institutions (if applicable)	The activity doesn't generate additional costs on the public institutions. In exceptional situations, it may be necessary to modify the space in order to adapt it to the implementation of the storage function
Expected result (if possible)	Provided heated storage space of a public institution in the City
