Idea description

Title:	Desinfection - support of local drugstore sellers
Idea objective	<p>The objective of the action is to support local drugstore retailers by organizing purchasing process of the disinfection products in local shops rather than using on-line offers. The intention is to secure the continuous sales of the products in the situation losing market, rising online transactions of the buyers, rising prices.</p> <p>As it was noted after the COVID19 pandemics, many local stores suffer from lack of competences to use online shop tool to sell products, as their market was defined as local and no delivery was needed. The new trend reduced their incomes and threaten existence. Rising prices connected with the recession and war on Ukraine do not simplifying their business activity (changing consumption model).</p>
Sharing process (max 1000 characters)	<p>Implementation of the initiative is the process that requires 3 measures:</p> <ol style="list-style-type: none"> 1. Preparation phase – definition of the disinfection materials that can be bought by the public institution without complicated procedures (e.g. tender procedures); 2. Definition of the local products/distributors that can deliver products; 3. Entering orders into the institution purchasing systems. 4. Ensuring the daily offer and delivery control.
Restrictions/rules (law, skills, time, other)	Implementation of the idea requires securing the formal aspect of purchasing goods from the market (due to the national and local (institutional) rules/law).
Procedures (if applicable)	<p>The implementation mechanism should be connected with following procedures:</p> <ul style="list-style-type: none"> - control process of the city budget, - searching for items that could be implemented by direct input, - selection of suitable suppliers.
Costs for public institutions (if applicable)	Implementation process require covering costs of purchasing the goods, but from the public institution perspective there can be not visible differences or small between prices of good bought in local shop compering to the earlier purchasing way.
Expected result (if possible)	Regular purchases of chemical good in local shops.
